

Centre for Bioscience and Nanoscience Research (CBNR)

(Affiliated to Bharathiar University, CBE)

ISO 9001 : 2015 Certified

ABOUT US

CBNR (Centre for Bioscience and Nanoscience Research) is an ISO Certified (9001-2015) and affiliated to Bharathiar University, research institute was established in 2010 with the objective of providing need based and high quality productive research in different disciplines of life sciences. Young and vibrant minds are made mundane by piling up of mere theory rather than practice. In such a scenario, CBNR has taken a different route to embark upon quality training. Bridging the gap between Industry and academia is the focal point of all efforts at CBNR . The current CBNR comprises of 5 faculty , 3 Ph.D scholars in Microbiology and 7 Ph.D scholars in Biotechnology.

CBNR is Affiliated and approved Research Institute by Bharathiar University to conduct M.Phil and Ph.D programmes in Microbiology and Biotechnology. CBNR has signed MOU with various colleges (12) , conducted workshops and Faculty development programmers (28). Submitted 106 gene bank sequences to NCBI and one patent . Our students and research scholars received 11 best paper awards. Total citation index of 1018 and published more than 85 research papers.

CBNR is 10 years old research institute and affiliated to Bharathiar University, ISO certified and MSME approved Research Institute is started its in-house R&D facility, in support of its world competence. CBNR Training and Research Institute prospects its R&D capability as a key component for its vertical growth.

CBNR enlighten the researcher minds with new technical research skills, encourage publishing their innovative research work thereby uplifts the students to succeed in their research career.

AREA OF RESEARCH

- ❖ Project/Training/Internship for the special needs of students of Biological Sciences, B.Tech, M.Tech, B.Sc, M.Sc, B.Pharm, MBBS, M.Phil and Ph.D scholars.
- ❖ Offers hands on Training Programmes and Academic projects on Molecular biology/ rDNA technology / Bionanotechnology / Food Technology/Environmental Microbiology/ Bioactive compounds/ Forensic Microbiology / DNA Finger Printing/ Drug designing and delivery etc..
- ❖ We also provide training in the publications of research papers in various International and National Journals.
- ❖ Guidance for JRF, CSIR, UGC – NET & GATE examinations / CBNR have the eminent scientific advisors for the guidance & motivations.
- ❖ Around 15000 students have completed their training / projects in our institute. Published many research papers. cbnr offers various implant hands on training / internship programme for the students and research scholars.

CBNR OFFERS :

Certificate programmes ; Lab skills development / Diploma and Advanced diploma programmes/ Academic research projects / Training / Internship / Mini and Main Project M.Phil and Ph.D In Microbiology and Biotechnology (Full time/Part Time)

CBNR offers various contract research and product research services, product validation and technology validation services varies from individual to industries, by keeping the quality as per Nation-al and International standards.

CONTRACT RESEARCH, R&D, AND TECHNOLOGY TRANSFER

- ❖ MicroBiology ❖ Biotechnology ❖ Botany /Zoology ❖ Nano Technology / Biochemistry ❖ Phytochemistry
- ❖ MolecularBiology ❖ Cancer biology ❖ Food Scinece and Food technlogy ❖ Bioinformatics ❖ Biopharma
